

# KUNLUN WU

116th and Broadway, New York | 2032607333 | [kw3037@columbia.edu](mailto:kw3037@columbia.edu) | <https://kunlun-wu.github.io/>

## EDUCATION

---

### Columbia University

MS in Materials Science and Engineering, 3.7/4.0

New York, NY  
Ongoing, expected graduation May 2026

### Columbia University

BS in Materials Science and Engineering, 3.6/4.0  
Dean's List

New York, NY  
May 2024

### Colgate University

BA in Physics and Japanese, 3.8/4.0  
Dean's Award with Distinction

Hamilton, NY  
May 2024

## EXPERIENCE

---

### Columbia University: School of Engineering

*Chan Research Group, Undergraduate Researcher (PI: Siu-Wai Chan)*

New York, NY  
Aug 2023 - May 2024

- Impedance and Structural Analysis of Copper-Doped Nanoceria
  - Area: Materials Science, Ceramics, Nanoparticles
  - Led a team of 3 to co-precipitate 6 groups of copper-doped nanoceria (0-16% Cu content)
  - Investigated conductivity through impedance spectroscopy (EIS) measurements across 6 temperatures
  - Performed structural analysis using pair-distribution-function (PDF) data obtained from X-ray diffraction (XRD)
- Refractive Index Enhancement of Polymer Thin Films with Nanocrystalline Ceria
  - Area: Materials Science, Photonics, Thin Films
  - Collaborated with Professor Nanfang Yu's metaoptics lab
  - Produced 6 groups of SU8+thinner precursors with various concentrations of ~10 and 35 nm nanoparticles
  - Conducted dynamic light scattering (DLS) measurements
  - Analyzed 36 sets of ellipsometry measurements from spin-coated films on Si substrate using Cauchy model

*MetaOptics Lab Researcher (PI: Nanfang Yu)*

Aug 2024 - Present

- Refractive Index Engineering of Polymer Thin Films via Metal-Ion Doping and Optical Modeling
  - Area: Materials Science, Photonics, Thin Films, Machine Learning
  - Investigated metal-ion doping (Ce, Cu, and Ti) to enhance the refractive index of SU-8 thin films.
  - Performing ellipsometric and Lorentz/Cauchy optical modeling for 20 sets of samples (5-25wt% ion concentration)
  - Developing a preliminary machine-learning framework to correlate compositional variables with optical constants
  - Ongoing

### Oriental Fortune Capital: Shanghai Branch

*Assistant Investment Manager (Intern)*

Shanghai, CN  
Jun 2023 - Aug 2023

- Conducted market research on Chinese desktop CPU industry from 2022 to 2023
- Developed investment analyses for 9 firms of interest, constructing an evaluation framework spanning across 5 key areas

## HONORARY SOCIETIES

---

### Materials Research Society (MRS) & Materials Advantage: CU Student Chapter

*Vice President*  
*President*

New York, NY  
Aug 2023 – Dec 2023  
Jan 2024 - Present

## SKILLS

---

- Language: Chinese (Native), Japanese (Proficient)
- Programming: Python (data analysis, optical modeling, scikit-learn)
- Experimental: Ellipsometry, EIS, XRD, DLS, SEM, AFM
- Extracurricular: PC building, Classical Guitar, Guqin, Taichi, Drawing, Seal Carving
